This easy-to-follow guide will provide you with everything you need to make your own homemade hand sanitizer with alcohol disinfectant. This DIY hand sanitizer is just as effective as commercial brands, but it's much more affordable and easy to make.

Ingredients

- 2/3 cup (150ml) rubbing alcohol (70% isopropyl alcohol or higher)
- 1/3 cup (75ml) aloe vera gel
- 5-10 drops essential oil (optional)

Equipment

- Measuring cups and spoons
- Funnel
- Small bottle (4-8oz)

Instructions

1. In a small bowl, combine the rubbing alcohol and aloe vera gel. 2. Add the essential oil, if desired. 3. Stir until well combined. 4. Using a funnel, pour the mixture into the small bottle. 5. Cap the bottle tightly and shake well.

How to Use

To use your homemade hand sanitizer, apply a small amount to the palm of your hand and rub it in until your hands are completely covered. Allow the hand sanitizer to air dry for at least 20 seconds.

Use your homemade hand sanitizer as often as needed, especially after touching surfaces that may be contaminated with the virus.

Tips

- For a thicker hand sanitizer, add more aloe vera gel.
- For a more scented hand sanitizer, add more essential oil.

- If you don't have aloe vera gel, you can substitute it with glycerin or water.
- Store your homemade hand sanitizer in a cool, dark place for up to 6 months.

Making your own homemade hand sanitizer with alcohol disinfectant is a quick, easy, and affordable way to keep your hands clean and free of germs. By following the instructions in this guide, you can create a hand sanitizer that is just as effective as commercial brands, but is much more convenient and cost-effective.

Stay healthy and safe!
