## The Power of the 13th Sign

The traditional zodiac, with its 12 signs, has served humanity for centuries, providing a valuable framework for understanding our personalities,

relationships, and life experiences. However, Tubb's research reveals that there is a missing piece in this astrological tapestry—the 13th Sign, known as Ophiuchus.

Ophiuchus, the Serpent Bearer, is a constellation that has been ignored by traditional astrology despite its prominent presence in the night sky. Tubb argues that this omission has created an imbalance in our understanding of the zodiac, leaving us with an incomplete picture of our potential.
